

CE [0007] The cover part of the invention is a multilayered plastic molded part, which includes a substrate comprising EPP (expanded polypropylene) foam and a sound absorbing layer. In this manner, a cover part that absorbs sound in an especially advantageous manner is created. Hence, heating and air conditioning system noises and/or noises from other components are passed on only in a very reduced form into the interior of the vehicle.--

IN THE CLAIMS:

Please amend claims 16 and 19 as follows:

16. (Twice amended) A passenger motor vehicle comprising:

CE a vehicle windshield,
a crossmember on which the vehicle windshield is mounted,
and

a vehicle dashboard assembly disposed behind the windshield in front of a vehicle passenger space,

said dashboard assembly including a housing part provided with fastening structure, and a cover part having slotted recesses therein for receiving the fastening structure when the cover part is installed in the vehicle,

wherein the fastening structure and the recesses are inclined toward the vehicle passenger space, and

wherein the housing part is mounted to the vehicle body and the cover part is thereafter detachably fixed to the housing part.

19. (Twice amended) A method of making a passenger motor vehicle comprising:

mounting a vehicle windshield in a final position on a vehicle body,

mounting a housing part provided with fastening structure adjacent the vehicle windshield at a side of a vehicle passenger space facing the windshield, and

subsequently detachably connecting a cover part of a vehicle dashboard to the fastening structure,

wherein the cover part is provided with slotted recesses therein for receiving the fastening structure when the cover part is installed in the vehicle, and

wherein the fastening structure and the recesses are inclined toward the vehicle passenger space.
